Professional Summary

Senior Full Stack Software Engineer with nearly 30 years of experience delivering robust, high-performance software solutions across diverse industries. Operating through AGYNAMIX, I specialize in taking complex, system-critical applications from prototype to production—whether leading development efforts or integrating into distributed teams, bridging intricate backend architectures with modern, responsive frontend frameworks. Recent work includes applied AI integration and Agentic Engineering, including AI-assisted PDF invoice analysis in AGYNAMIX Invoicer with structured extraction, vision models, JSON schema outputs, semantic checks, alternative candidates, and user-in-the-loop review.

Core Services & Consulting

- **End-to-End Application Development:** Complete solutions from requirement gathering through implementation and deployment.
- **Applied AI & Workflow Automation:** Practical AI integration using Agentic Engineering, LLMs, document AI, and structured extraction.
- **High-Performance Backend Systems:** Scalable, concurrent backends using Rust, Scala, and Java.
- **Modern Frontend Architecture:** Responsive, client-centric UIs with ReactJS, TypeScript, and Angular.
- **Cloud & DevOps Integration:** Mission-critical deployments and containerization with AWS, Docker, and Ansible.

Technical Stack

Applied AI:	Agentic Engineering, LLM integration, document AI, PDF extraction, vision models, JSON schema outputs, Ollama
Languages:	Scala, Java, Rust, Kotlin, TypeScript, JavaScript, Clojure
Frameworks & UI:	ReactJS, Angular, Lift, Jetpack Compose for Desktop, Vue
Databases:	PostgreSQL, MongoDB, Oracle, MySQL
Cloud & DevOps:	AWS, Docker, Ansible

Notable Clients & Projects

- **Enterprise Collaboration—Scaled Agile, Inc.** 2019 – 2024
Key role in developing and modernizing an online planning platform for remote learning, PI planning, and collaborative events. Designed a push-based data warehouse integration.
- **Compliance Management—Ascendant** 2013 – 2019
Senior engineer and mentor for a multi-tenant SaaS platform, balancing industry-specific compliance with engineering problem-solving.
- **Social Privacy Platform—Sgrouples / MeWe** 2011 – 2012
Implemented system-critical features and managed AWS deployment for a secure, group-based communication platform.
- **Telecommunications & Banking—T-Systems, 1822direct** 2005 – 2011
High-performance data extraction, migration frameworks, and correspondence management solutions.

Own Products & Innovations

- **AGYNAMIX Invoicer** 2025 – present
Modern desktop invoicing application (Kotlin, Jetpack Compose for Desktop) for the DACH market. Fully GoBD compliant with ZUGFeRD and XRechnung e-invoice support. AI-assisted PDF invoice analysis extracts supplier, invoice number, dates, VAT amounts, totals, and metadata using local and remote OpenAI-compatible providers, including privacy-friendly local Ollama models.
- **Symnix—Cloud Provisioning Platform** 2022 – present
Co-founded web application with a high-performance Rust / PostgreSQL backend for cloud server setup and provisioning.
- **Net-Herald Monitoring Software** 2005 – 2006
Monitoring system for water supply companies built with Java, Spring, PostgreSQL, and an Eclipse RCP frontend using GEF for real-time data visualization.

Education & Publications

Diploma in Computer Science (Dipl.-Inf.) | Technical University Chemnitz-Zwickau, 1991 – 1996

Author: *Lift Web Applications How-To* (Packt Publishing, 2012) | Speaker at ScalaDays & Scala Exchange, 2013
